Summary

Unity Game Developer with experience developing gameplay systems, multiplayer features, UI/UX improvements, and game mechanics using Unity, C#, and Photon technologies. Skilled in gameplay programming, problem-solving, optimization, and rapid prototyping. Passionate about building polished and engaging player experiences.

Education

SRM Institute of Science and Technology (SRMIST) Expected May 2028

B.Tech in Computer Science (Gaming Technology) CGPA: 9.30/10

Tagore Academy March 2024

ISC (Science) 84%

Experience

Game Developer Intern — Jabsz Gaming Studios LLP Aug 2025 – Dec 2025

- Developed gameplay systems and internal tools for a Unity-based multiplayer project.
- Worked with Photon Fusion networking systems and multiplayer mechanics.
- Improved bot AI behavior and enhanced player-facing UI elements.
- Assisted in implementing and testing multiple game maps while maintaining project confidentiality.

Projects

Spy Fiction Unity, C#

[Live Demo](#) — [Source Code](#)

- Developed a stealth-action game featuring enemy AI, patrol systems, vision-based detection, combat mechanics, and mission-driven gameplay.
- Implemented state-based enemy behavior including Patrolling, Suspicious, Investigating, Searching, and Chasing states using Unity NavMesh.
- Built reusable gameplay architecture with optimized C# scripts, custom UI systems, and scalable level design for future campaign expansion.

Wither Woods Unity, C#

[Live Demo](#) — [Source Code](#)

- Developed a horror exploration game featuring puzzle-solving and narrative-driven progression.
- Designed environmental tension systems and immersive gameplay mechanics.

Merry Catcher Multiplayer Unity, C#, Photon PUN

[Live Demo](#) — [Source Code](#)

- Built a multiplayer 3D arcade game with cross-platform support for PC, Android, and WebGL.
- Implemented networking, scoring systems, collectibles, and responsive controls.
- Created character animations in Blender and optimized gameplay performance.

Technical Skills

Game Development: Unity, Photon Fusion, Photon PUN, Gameplay Programming, UI/UX

Programming: C#, Java, Python, C, OOP, Data Structures & Algorithms

Tools: Git, GitHub, Blender 3D, Visual Studio

Certifications

- Unity Certified Junior Programmer (2025) - ([Link](#))
- NPTEL Programming in Java (2025) - ([Link](#))
